2017 OABB Annual Meeting Program

OBJECTIVES

Upon completion of program, user will:

1. Discuss a brief history of quality
2. Identify current state models and potential issues faced today
3. Identify potential ways Quality will be able to adapt to changes in the future
4. Identify criteria for considering an infection of interest to the blood community
5. Identify the methods used to mitigate risk
6. Recognize the limitations of methods used to mitigate risk
7. Recognize and apply current FDA expectations with respect to bacterial contamination of platelets
8. Describe the steps required to achieve extended dating on apheresis platelet units
9. Explain the benefits and limitations of currently available pathogen inactivation technologies
10. Describe their role in building “brand awareness”
11. Identify ways to impact their personal brand
12. Explain how their professional image impacts their ability to attract and retain talented people
13. Explain the background and history of how CLIA came about
14. Illustrate the relationship between CLIA and Laboratory Testing
15. Review the top ten deficiencies of CLIA
16. Define a plan for competency assessment
17. Identify if a particular individual’s competency is complete
18. Determine if their personnel are collectively on track for completion of competencies
